Fund Objective and Strategy

The investment objective of the Fund is to seek to achieve an annual compounding rate of return over the long term, defined as 5-10 years, which is superior to the median performance of all of the funds forming the official peer group of which the Fund is part. 'Peer group' is defined as being the Investment Association sector to which the Fund has been allocated (currently being the UK All Companies Sector) or to which it may be allocated in future, as determined by that body. Investments will be made principally in UK equities with strong operating franchises and experienced management teams, applying the methodology of Business Perspective Investing.

Fund Commentary

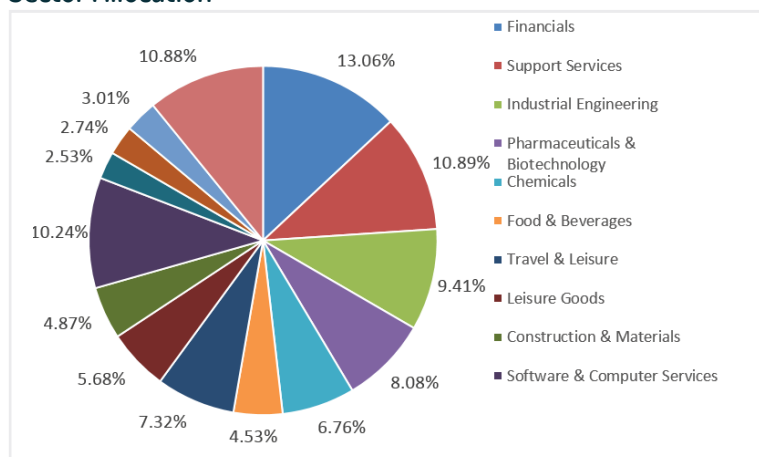

November was a satisfying month for the performance of our investments. The Income (I) Class put on 7.1% with the share price rising from 320.30p to 343.17p, an all-time high. This compared favourably to the performance of the UK stock market, which rose by 1.8%. The gains were broadly based across the portfolio with 28 risers and seven fallers. Eight of the risers posted double-digit gains, led by Games Workshop +29.1%, Liontrust +21.6%, newcomer Softcat +21.1% and Dart Group +17.7%. All these movements were spurred on by well-received results and/or trading statements. The seven losers were single-digit fallers. Net inflows during the month totalled £33.0m and £31.9m was invested, put to use increasing our ownership of existing companies. The reduction in the proportion of cash therefore reflects the strong performance of our equity holdings.

It is probably worth remarking that amidst all the supposed turmoil of Brexit and a General Election, good companies continue to produce good outcomes whilst bad companies seek the shelter of blaming external factors for their woes. It is all too reminiscent of the 9/11 excuses in another time. Hopefully, we will soon have a decisive mandate for Boris Johnson to take us out of the EU, thus removing the uncertainty and allowing us all to get on with our lives. The alternative of an extreme hard left government or a hung parliament and yet more indecision is too damaging to contemplate.

Something that I seldom comment on is our low portfolio turnover. As I have said on so many occasions, my ideal holding period is forever, and I eschew profit taking when an excellent company is temporarily overvalued by the stock market. I will not be 'faked out' of our ownership interests by short-term considerations. For the record, our current portfolio turnover, measured over the last 12 months, is 0.68%, equivalent to an average holding period of 147 years. Only by holding for the long-term do you harness the extraordinary power of compounding. Peter Lynch used to talk about "stalking the elusive ten-bagger". Well, we have four of those in the portfolio when comparing the first price paid with today's price: Dart Group first bought Oct-12 and now an 18-bagger; Games Workshop, Apr-11, 15-bagger; Liontrust, Nov-11, 13-bagger; and AB Dynamics, Jun-15, 11-bagger. You will never enjoy these by constantly chopping and changing a portfolio. Long Term Buy & Hold works.
